In order to facilitate the notification process in cases of infringement, OSP's which allow users to store information on their networks, such as a web hosting service, must designate an agent that will receive the notices from copyright owners that its network contains material which infringes their intellectual property rights. In order to comply with this provision, contact information for Lithium Hosting, llc's agent is specified below:

11. SPAM / UNSOLICITED EMAIL

You agree that you may not use the Lithium Hosting, llc Network, Lithium Hosting, llc equipment or any Lithium Hosting, llc email address in connection with the transmission of spam and/or unsolicited email messages. You agree that your domain may not be referenced as originator, intermediary, or reply-to address in any of the above. This prohibition extends to the sending of unsolicited mass mailings from another service that in any way implicates the use of the Lithium Hosting, llc Network, Lithium Hosting, llc equipment or any Lithium Hosting, llc email address. A message is considered unsolicited if it is posted in violation of a newsgroup charter or if it is sent to a recipient who has not requested or invited the message. You understand and agree that Lithium Hosting, llc will be the sole arbiter as to what constitutes a violation of this provision.

Our [Email Policy](#) is also governed by this agreement and referenced in the [Acceptable Use Policy](#).

12. CONTINUANCE TIMESCALE

Hosting Accounts - all Shared Hosting, Virtual Private Servers and Dedicated Servers automatically renew on their anniversary date until explicitly cancelled by the Customer. All account upgrades purchased from the [Client Area](#) are valid and are to be functional until the final cancellation of the respective service.

Domain Name Registration / Transfer - Lithium Hosting, llc offers for registration/transfer all TLDs (Top-Level Domains) displayed in the table [on this page](#). The TLDs can be purchased either together with a shared hosting account (at regular or PROMOTIONAL price) or separately as an upgrade from the [Client Area](#) (all TLDs - at NON-PROMOTIONAL prices).

Domain names are valid for the number of years of their registration (domain names can be registered for the period of 1 to 10 years, depending on their TLD - top-level domain name - extension). After an expiration of a domain name several stages follow regarding its renewal.

- The domain name Redemption Grace Period (RGP) is a registry level period of up to 30 days after the domain name's expiration date. During this period the domain name is kept on hold by the Registrar before it gets deleted. The domain registrant is allowed to retrieve the domain name from deletion, but this process costs additional redemption fee. This extra 30-day period extends the time available for renewing domain names. However, all domains that enter a redemption period are removed from the zone files (the list of domain names currently in the global DNS), therefore any web site or e-mail services associated with the domain name will stop working.
- Extended Redemption Grace Period - the extended redemption grace period adds another 7 - 30 days to the domain name's redemption period. During this period the domain name owner is allowed to retrieve the domain name from deletion paying the redemption fee.
- After the redemption period of an expired domain name is finished, comes the Pending Delete Period - a registry level period of up to 5 days during which no one is allowed to renew the domain name and it cannot be newly registered because it's still not returned to the public pool of domain names.
- Released by Registry Period - the domain name is sent back into the public pool of domain names and is newly available for registration.

Customers are advised to renew their domain registrations before their domain names are placed into redemption. When a domain name transits into redemption period, DNS, Email, and the web site and any other associated services will cease to function.

During a domain name's redemption period, we can assist the customer in retrieving his/her domain name from deletion only if the domain name was registered with us. The customer will need to pay a REDEMPTION FEE of up to \$270.00 USD for the domain registration renewal. If the domain name was registered with another registrar, the customer needs to contact that registrar for more information regarding its redemption.

13. AFFILIATE ACCOUNTS

Lithium Hosting, llc reserves the right to disqualify an affiliate account or commission for any reason at any time.

Affiliate commissions are made on the 1st of the month. All new commissions must go through a maturation period of 3 months. Commissions made on the 1st of the month are a recurring percentage of the referral monthly rate. Payouts will be granted once a month at maximum, provided that your account's affiliate balance exceeds \$50. Smaller payouts will not be made.

Affiliate commission payouts can only be posted as an account credit to be used to purchase Lithium Hosting, llc services or pay for existing services. We no longer issue payouts via check or PayPal.

14. BILLING, PAYMENTS AND FEES

You agree to supply a valid payment for the services received from Lithium Hosting, llc, in advance of the time period during which such services are provided. You agree that all fees, domain fees, deposits and setup fees are non-refundable. You agree that until and unless you submit a cancellation request for your services those services will be billed on a recurring basis. You agree that payments will be billed and charged automatically, and that we may apply the amount due to the provided payment method at any time. You agree that you will keep your account information updated, so that Lithium Hosting, llc can notify you of transactions on your account.

Non-Payment - payment on all accounts is due by the listed due date on the applicable invoice. Any account that has an outstanding invoice for more than 7 days will be subject to a \$10 late fee and suspension. The suspension date varies by product but all accounts are subject to suspension after 7 days of non payment.

Non-Refundable Services - All service upgrades, addon products and plan renewals are exempt from refunds. All single-year or multi-year domain registration, transfers and renewals are also exempt from refunds.

Payment Disputes and Chargebacks - A chargeback is the forced reversal of a payment made to a merchant by a consumer using a credit card. Lithium Hosting, llc will consider any customer that files a chargeback to be committing fraud and will take any and all appropriate measures and/or legal actions to defend and protect against said fraud.

Chargebacks are not considered as a way of refunding. Any Customer who initiates a payment chargeback in response to a bill or order placed with Lithium Hosting, llc will be subject to full investigation. Chargeback processing costs time and money, it is much easier and cheaper to work out billing issues with our billing team.

When signing up for an account with Lithium Hosting, llc, the Customer agrees to the conditions explicated in our Acceptable Use Policy (AUP) and the Terms of Service (this document). Thus, Lithium Hosting, llc, as well as our authorized credit card processor, will resort to these documents as an evidence for the Customer's agreement, especially in the event that a Customer sends a chargeback inquiry based on points that he/or she first accepted, but is trying now to refute.

Customer acknowledges that if a chargeback is filed against a transaction that resulted in the purchase, transfer or renewal of a domain name, Customer forfeits ownership of the domain to Lithium Hosting, llc. Lithium Hosting, llc will decide whether to hold the domain name in its own portfolio or to release it for use by others.
